

## A Better Way of Making Stock Doors and Frames

*Every stock door and frame is made to order in one day from our large inventory of raw materials.*

Many manufacturers maintain a warehouse of pre-made stock products, offering you any door or frame as long as it's in their inventory of finished goods.

Not Door Components. We offer a better way of manufacturing stock doors and frames. Every stock product is made to order and available for pickup on the same day.

No longer do you need to be concerned about buying a stock product that may have been warehoused for a long time, perhaps even a second or shipped from another location.

Door Components doesn't have a warehouse of stock doors. Our warehouse is full of raw materials, ready to make a new stock product to your order, in one day. Our promise – order by 10 a.m., pick up by 4 p.m. every business day.

Furthermore, who wants a stock door that only fits "most" openings? At Door Components we offer more size and hardware options for our stock products than any other hollow metal door manufacturer. Additionally, you can order a Door Components stock door to fit another manufacturer's frames, or a Door Components stock frame to fit another manufacturer's doors.

Our team is highly knowledgeable and experienced in the hollow metal industry and is available to assist in the order process.
