

Why do Dealers say the StockPlus Program is the Best?

One-day Availability with Custom Door and Frame Quality

Hollow metal stock doors and frames are usually regarded as a trade-off by dealers. The main advantages of stock products are:

- **Fast availability**, often same-day or next-day
- **Lower prices** than custom doors and frames

Door Components' Stock Plus™ program has all of the advantages of a stock door and frame program — and then some — with none of the disadvantages!

The reason is that we make each stock door and frame to order in our state-of-the-art manufacturing facility in Southern California, using the same material that goes into our custom doors and frames.

- **Same-day pickup**, next day-delivery to five counties in Southern California.
- **All manufacturers' hinge and lock locations are supported**, including combining multiple manufacturers' locations on a single order. It also includes multiple manufacturers' hardware preps.
- **Variety of features** often not available with stock products, including cutouts for louvers and lites, precision function holes, both Honeycomb and Polystyrene core doors, KD drywall and Masonry frames, and up to 8 foot tall doors and frames.
- **Custom quality**, including galvanized on all surfaces, precision cut, and using the identical materials as custom.
- **Every stock product is made-to-order**. At Door Components we don't believe in warehousing an inventory of stock doors and frames, because we make every stock product specifically to YOUR order. If it's on our extensive line card of stock products, you can get it the same day. There's never an out-of-stock problem with stock products at Door Components.
- **Lower Prices** than custom doors and frames.
- **No minimum order quantity**. Unlike other manufacturers we do not require volume purchases to get stock pricing with quick delivery.

The Door Components website has additional information of our stock doors and frames.
